Automatic Carpet Detection

**All in one.
One for all!**

Perfect cleaning for every floor covering.

Live Smart. Enjoy Life.

DEEBOT OZMO 930

Do you spend more time cleaning than you like? Find out how convenient floor cleaning with a robot is! Thanks to the revolutionary OZMO technology, the DEEBOT OZMO 930 vacuums and mops an entire floor completely automatically. The integrated water tank holds up to 250 ml of water and moistens the large microfibre cleaning cloth for the whole duration of the cleaning process. The DEEBOT OZMO 930 is a floor cleaning robot that has intelligent functions such as room and carpet detection. With the extensively improved Smart Navi Technology, the DEEBOT scans the surroundings and creates a detailed map of it. Then it systematically cleans room by room, and it can be controlled by app. Some of the options include the ability to use your smartphone to select individual rooms to be cleaned, draw virtual walls and check on the cleaning progress.

FEATURES

OZMO Technology

The revolutionary OZMO technology offers real two-stage floor cleaning. The DEEBOT can vacuum and wet mop all at once. The electronically controlled water tank holds 250 ml and keeps the washable microfibre cleaning cloth constantly moist until the cleaning process is finished.

Smartphone Control

With the ECOVACS app, you can operate your DEEBOT from anywhere: you can guide the vacuum cleaner robot through the rooms and navigate exactly to where it is needed. You determine the cleaning time and set the ideal type of cleaning that best suits your floor type.

Smart Navi Technology

With the help of Smart Navi, the DEEBOT can scan and map a complete floor. Users can use the cloud to control cleaning routes, define virtual lines, select individual areas to be cleaned and use many other functions from anywhere with the help of the touch function.

Automatic Carpet Detection

The DEEBOT automatically cleans carpets and rugs with double the suction power. This action enables the DEEBOT to remove deep-seated dust and dirt from the carpet. The increased suction power is only used when it is necessary. This on-board intelligence protects the battery power and provides the DEEBOT with the necessary stamina to continue its powerful cleaning.

Intelligent Technology

- Voice messages in real time
- Direct suction (optimised for animal hairs)
- Automatic charging
- Obstacle detection
- Stair Safety Technology

Key data

Sound level	approx. 65 dB
Charging time	approx. 3 – 4 h
Battery	Lithium, 3200 mAh
Maximum operating time	approx. 110 min.
Volume of the dust box	470 ml
Max. height of the doorsill	approx. 1,6 cm

What's in the Box?

- 1 Floor cleaning robot DEEBOT OZMO 930
- 1 OZMO water tank
- 2 Washable and reusable microfiber cleaning cloths
- 4 Side brushes
- 2 Dust filter
- 1 Direct suction attachment
- 1 Manual
- 1 Cleaning tools
- 1 Charging dock

Specifications

Name	DEEBOT OZMO 930
Net weight	4,6 kg
Robot dimensions	354 x 354 x 102 mm
Product package weight	6,9 kg
Product package dimensions	507 x 424 x 143 mm
Master carton weight (1 in 1)	7,5 kg
Master carton dimensions (1 in 1)	520 x 436 x 151 mm
EAN EU	6943757610570
