

DEEBOT 900

Features

- Smart Navi Technology
- Control via ECOVACS app
- A variety of suction methods
- OTA-Updates

Customisable, effective cleaning just the way you need it

Using the latest navigation technologies, the DEEBOT 900 virtually maps your home for cleaning

Live Smart. Enjoy Life.

DEEBOT 900

When you first use your DEEBOT 900, you will be amazed by how silently it roams the floors of your home using its multiple, intelligent sensors to navigate around and even under your furniture. Press one button, and the DEEBOT 900 gets busy: all the fur, crumbs, dirt and dust will soon be gone, leaving you to get on with more important things. The DEEBOT 900 is a robot vacuum that cleans systematically with a unique mapping function, automatically going wherever you need it. You want the LEGO® castle, the pile of delicate cables, or the dog's blanket left untouched? No problem. Areas where vacuuming is not required can easily be defined in the detailed virtual map of your home. You can set it all up in the ECOVACS app on your smartphone or tablet and, once you've entered your settings, there's nothing more you need to do.

FEATURES

Smart Navi Technology

The laser-based navigation creates an accurate virtual map of the DEEBOT's surroundings. This cutting-edge technology gets to know every corner of your home and enables the DEEBOT to find the optimized route for perfect cleaning. The precise Smart Navi Technology allows you to draw virtual boundaries or pinpoint specific areas, so the DEEBOT knows not to touch your kids' toys or your dog's blanket.

Total Control with the ECOVACS app

Are you looking for customised cleaning? No problem – just use the ECOVACS app on your Smartphone. You can schedule cleaning times and specify which rooms should be part of the routine cleaning procedure. Set cleaning modes, monitor the status of each clean, and enjoy all the conveniences of automated housework while at home or on the go. It's easy to set up and control exactly as you need.

A number of suction options to match your needs

The DEEBOT's suction methods can be changed according to your needs, with a choice between a main brush or an easily interchangeable direct suction inlet. The tangle-free suction inlet effortlessly collects hairs with no risk of tangling. Using the main brush, you can achieve greater lift and deeper cleaning, especially on carpets.

OTA-Update – get the latest technology updates

As we discover new ways to make the DEEBOT even better, you'll be the first to benefit. The OTA technology ("Over-the-Air") includes easy-to-install wireless updates: important firmware upgrades, as well as new features, will be loaded directly onto the robot – and they'll take effect immediately. Your D900 will always be ready to show off the latest innovations that build on 20 years' experience.

Intelligent Technology

-  Easy to use
-  Voice messages in real time
-  Automatic charging
-  Obstacle detection
-  Stair safety technology
-  High-efficiency filter

Key data

Sound level	approx. 67.5 dB
Charging time	approx. 4 h
Battery	Ni-MH 3000 mAh
Maximum operating time	approx. 100 min.
Volume of the dust box	350 ml
Max. height of the doorsill	approx. 1.8 cm

What's in the Box?

- 1 Floor cleaning robot DEEBOT 900
- 4 Side brushes
- 2 Dust filters
- 1 Direct suction attachment
- 1 Manual
- 1 Set of cleaning tools
- 1 Charging dock
