

## DEEBOT PRO 930

### Features

---

- All around the home
- Vacuuming and mopping
- Smart Navi™ 3.0
- Automatic Carpet Detection

# The combo robot with handy cordless vacuum

Your all-in-one cleaning master

Live Smart. Enjoy Life.

# DEEBOT PRO 930

If you are looking for a comprehensive cleaning platform that incorporates the convenience of a robotic and cordless vacuum cleaner, look no further! The DEEBOT Pro 930 is your handy helper that provides carefree robotic cleaning in combination with a convenient cordless vacuum unit. The robot keeps your floors clean by vacuuming and mopping even hard-to-reach areas under furniture, while the cordless vacuum can be used to clean all non-floor surfaces - to give your home an unprecedented level of cleanliness from top to bottom!

## FEATURES

### All around the home

Robotic vacuums provide unparalleled convenience, but are not able to clean non-floor surfaces. That's why we've added an easy-to-use cordless vacuum to give you a comprehensive cleaning solution with which to clean your entire home from top to bottom - including all those hard-to-reach areas.

### Integrated vacuuming and mopping

An electronic pump draws water from a large reservoir and applies just the right amount to ensure optimal mopping of your floors. With the combination of innovative OZMO™ Mopping Technology and powerful vacuum suction, the DEEBOT sweeps, vacuums and mops your floors to give them an extra shine. What's more, the robot has sensors to automatically turn the mopping mode on and off to ensure a safe deep clean.

### Mapping and navigation technology

Using Smart Navi™ 3.0 technology the DEEBOT scans your home and creates a visual map in the ECOVACS Home App which you can use to individually determine the areas you want cleaned.

### Carpet detection technology for independent cleaning

When the DEEBOT's carpet detection sensors notice it is on a carpet, the suction power is automatically boosted to ensure additional cleaning power. And when in mopping mode, the DEEBOT avoids carpets to ensure ideal mopping results.

### Intelligent Technology

Voice messages in real time

Direct suction (optimised for animal hairs)

Automatic charging.

Obstacle detection.

Stair safety technology.

### Key data Robotic/ Cordless Vacuum

|                             |                             |
|-----------------------------|-----------------------------|
| Sound level                 | approx. 65 dB/ 85 dB        |
