DESCRIPTION

The Tristar KA-5912 Convector heater is the perfect additional heater during the winter. The compact heater has integrated handles that allow you to easily move it. The maximum power of 2000 Watt ensures you can warm up your room in no time. Additionally, the heater has a turbo mode, an adjustable thermostat and an overheat protection.

Convector heater

A convector heater is perfect if you want to heat a room fast. Moreover, it is almost noiseless and therefore suitable for your bedroom or living room.

Turbo mode

You can set the heater to your own preferences with the different power modes and the adjustable thermostat. The turbo mode allows the heater to blow harder and to heat up the room in no time. You can always see if the radiator is still on thanks to the indicator light. Thanks to the overheat protection the radiator will turn off when it gets too hot.

What's in the box:

Tristar convector heater, instruction manual

Reasons to choose the Tristar convector heater:

- Easy to operate with the turning dial and switches
- Easily set the temperature with the adjustable thermostat
- Equipped with turbo mode for a faster air distribution
- Safe to use thanks to the overheat protection
- Can be placed anywhere with the size of 20 x 53.5 x 38.5 cm
