Safety

Observe the following safety instructions.

General information

- Read this instruction manual carefully.
- Keep the instruction manual and the product information safe for future reference or for the next owner.
- Do not connect the appliance if it has been damaged in transit.

Intended use

Only use this appliance:

- For washing machine-washable fabrics and hand-washable wool in accordance with the care label.
- With tap water and commercially available detergents and care products suitable for washing machines.
- In private households and in enclosed spaces in a domestic environment.
- Up to an altitude of max. 4000 m above sea level.

Restriction on user group

This appliance may be used by children aged 8 or over and by people who have reduced physical, sensory or mental abilities or inadequate experience and/or knowledge, provided that they are supervised or have been instructed on how to use the appliance safely and have understood the resulting dangers.

Children must not play with the appliance.

Cleaning and user maintenance must not be performed by children unless they are being supervised.

Keep children under the age of 3 years and pets away from the appliance.

Safe installation

Take note of the safety instructions when installing the appliance.

WARNING – Risk of electric shock!

- Improper installation is dangerous.
 - ▶ Connect and operate the appliance only in accordance with the specifications on the rating plate.
 - ▶ Connect the appliance to a power supply with alternating current only via a properly installed socket with earthing.
 - ▶ The protective conductor system of the domestic electrical installation must be properly installed. The installation must have a sufficiently large cross section.
 - ▶ When using a residual current circuit breaker, only use a type with the  mark.
 - ▶ Never equip the appliance with an external switching device, e.g. a timer or remote control.
 - ▶ When the appliance is installed, the mains plug of the power cord must be freely accessible. If free access is not possible, an all-pole isolating switch must be installed in the permanent electrical installation according to the installation regulations.
 - ▶ When installing the appliance, check that the power cable is not trapped or damaged.
- If the insulation of the power cord is damaged, this is dangerous.
 - ▶ Never let the power cord come into contact with hot appliance parts or heat sources.
 - ▶ Never let the power cord come into contact with sharp points or edges.
 - ▶ Never kink, crush or modify the power cord.

WARNING – Risk of fire!

It is dangerous to use an extended power cord and non-approved adapters.

- ▶ Do not use extension cables or multiple socket strips.
- ▶ If the power cord is too short, contact Customer Service.
- ▶ Only use adapters approved by the manufacturer.

⚠ WARNING – Risk of injury!

- The high weight of the appliance may result in injury when lifted.
 - ▶ Do not lift the appliance on your own.
- If this appliance is not correctly installed in a washer-dryer stack, the installed appliance may fall.
 - ▶ Only stack the dryer on a washing machine using the connection kit from the dryer manufacturer . No other installation method is permitted.
 - ▶ Do not install the appliance in a washer-dryer stack if the dryer manufacturer does not offer a suitable connection kit.
 - ▶ Do not install appliances from different manufacturers and with varying depths and widths in a washer-dryer stack.
 - ▶ Do not install a washer-dryer stack on a platform; the appliances may tip over.

⚠ WARNING – Risk of suffocation!

Children may put packaging material over their heads or wrap themselves up in it and suffocate.

- ▶ Keep packaging material away from children.
- ▶ Do not let children play with packaging material.

⚠ CAUTION – Risk of injury!

- The appliance may vibrate or move when in use.
 - ▶ Place the appliance on a clean, even, solid surface.
 - ▶ Align the appliance using the appliance feet and a spirit level.
- If hoses and power cords have been laid incorrectly, this causes a tripping hazard.
 - ▶ Lay hoses and power cords in such a way that there is no risk of tripping.
- If the appliance is moved by holding onto protruding components, such as the appliance door, the parts may break off.
 - ▶ Do not move the appliance by holding onto protruding parts.

⚠ CAUTION – Risk of cutting!

Touching sharp edges on the appliance may lead to cuts.

- ▶ Do not touch the sharp edges on the appliance.
- ▶ Wear protective gloves when installing and transporting the appliance.

Safe use**⚠ WARNING – Risk of electric shock!**

- If the appliance or the power cord is damaged, this is dangerous.
 - ▶ Never operate a damaged appliance.
 - ▶ Never pull on the power cord to unplug the appliance. Always unplug the appliance at the mains.
 - ▶ If the appliance or the power cord is damaged, immediately unplug the power cord or switch off the fuse in the fuse box and turn off the water tap.
 - ▶ "Call Customer Service." → *Page 68*
 - ▶ Repairs to the appliance should only be carried out by trained specialist staff.
- An ingress of moisture can cause an electric shock.
 - ▶ Only use the appliance in enclosed spaces.
 - ▶ Never expose the appliance to intense heat or humidity.
 - ▶ Do not use steam- or high-pressure cleaners, hoses or sprays to clean the appliance.

⚠ WARNING – Risk of harm to health!

Children can lock themselves in the appliance, thereby putting their lives at risk.

- ▶ Do not install the appliance behind a door as this may obstruct the appliance door or prevent it from opening.
- ▶ With redundant appliances, unplug the power cord. Then cut through the cord and damage the lock on the appliance door beyond repair so that the appliance door will no longer close.

⚠ WARNING – Risk of suffocation!

Children may breathe in or swallow small parts, causing them to suffocate.

- ▶ Keep small parts away from children.
- ▶ Do not let children play with small parts.

⚠ WARNING – Risk of poisoning!

Detergents and care products may result in poisoning if consumed.

- ▶ If accidentally swallowed, seek medical advice.
- ▶ Keep detergents and care products out of the reach of children.

⚠ WARNING – Risk of explosion!

Laundry that has been pretreated with cleaning agents that contain solvents may cause an explosion in the appliance.

- ▶ Rinse pretreated laundry thoroughly with water before washing.

⚠ CAUTION – Risk of injury!

- The covering plate may break if you stand on or climb onto the appliance.
 - ▶ Do not stand on or climb onto the appliance.
- The appliance may tip over if you sit on or lean against the open door.
 - ▶ Do not sit on or lean against the appliance door.
 - ▶ Do not place any objects on the appliance door.
- Reaching into the drum while it is still turning may cause hand injuries.
 - ▶ Wait for the drum to come to a complete stop before reaching inside.

⚠ CAUTION – Risk of burns!

When washing at high temperatures, the glass in the appliance door becomes hot.

- ▶ Do not touch the appliance door when it is hot.
- ▶ Keep children away from the appliance door when it is hot.

⚠ CAUTION – Risk of scalding!

When you wash at high temperatures, the detergent solution gets hot.

- ▶ Do not touch the hot detergent solution.

⚠ CAUTION – Risk of chemical burns!

If the detergent drawer is opened, detergent and care products may spray out from the appliance. Contact with eyes or skin may cause irritation.

- ▶ Rinse eyes and/or skin thoroughly with clean water if they come into contact with detergents or care products.
- ▶ If accidentally swallowed, seek medical advice.
- ▶ Keep detergents and care products out of the reach of children.

Safe cleaning and maintenance

Take note of the safety instructions when cleaning and performing maintenance work on the appliance.

⚠ WARNING – Risk of electric shock!

- Improper repairs are dangerous.
 - ▶ Repairs to the appliance should only be carried out by trained specialist staff.
 - ▶ Only use genuine spare parts when repairing the appliance.
 - ▶ If the power cord of this appliance is damaged, it must be replaced by the manufacturer, the manufacturer's Customer Service or a similarly qualified person in order to prevent any risk.
- An ingress of moisture can cause an electric shock.
 - ▶ Do not use steam- or high-pressure cleaners, hoses or sprays to clean the appliance.

⚠ WARNING – Risk of injury!

The use of non-original spare parts and non-original accessories is dangerous.

- ▶ Only use the manufacturer's original spare parts and original accessories.

 **WARNING – Risk of poisoning!**

Poisonous fumes may be given off if you use cleaning agents that contain solvents.

- ▶ Do not use cleaning agents that contain solvents.

Preventing material damage

Follow these instructions to avoid material damage and damage to the appliance.

ATTENTION!

- The functionality of the appliance may be impaired if you use the wrong quantity of fabric softener, detergent, care product or cleaning agent.
 - ▶ Follow the dosage recommendations from the manufacturer.
- Exceeding the maximum load capacity impairs the function of the appliance.
 - ▶ Observe the "maximum load capacity" → *Page 29* for each programme and do not exceed it.
- The appliance is secured for transportation using transit bolts. Transit bolts which have not been removed may result in material damage and damage to the appliance.
 - ▶ Before starting up the appliance, remove the transit bolts completely and keep them in a safe place.
 - ▶ Before transport, fit the transit bolts fully in order to prevent damage in transit.
- Material damage may be caused if the water inlet hose is connected incorrectly.
 - ▶ Tighten the screw connections on the water inlet until they are hand-tight.
 - ▶ Ideally, connect the water inlet hose directly to the water tap, without any additional connecting elements such as adapters, extensions, valves or similar.
 - ▶ Ensure that the inner diameter of the water tap is at least 17 mm.
- ▶ Make sure that the length of the thread on the connection to the water tap is at least 10 mm.
- If the water pressure is too high or too low, the appliance may not be able to operate properly.
 - ▶ Make sure that the water pressure in the water supply system is min. 100 kPa (1 bar) and max. 1000 kPa (10 bar).
 - ▶ If the water pressure exceeds the maximum value specified, a pressure-reducing valve must be installed between the drinking water connection and the hose set of the appliance.
 - ▶ Do not connect the appliance to the mixer tap of an unpressurised hot-water boiler.
- Modified or damaged water hoses may result in material damage and damage to the appliance.
 - ▶ Never kink, crush, modify or cut through water hoses.
 - ▶ Only use the water hoses supplied with the appliance or genuine spare hoses.
 - ▶ Never re-use water hoses that have been used before.
- Operating the appliance using water that is dirty or too hot may cause material damage.
 - ▶ Only operate the appliance with cold mains water.
- Unsuitable cleaning products may damage the surfaces of the appliance.
 - ▶ Do not use harsh or abrasive detergents.
 - ▶ Do not use cleaning products with a high alcohol content.
 - ▶ Do not use hard scouring pads or cleaning sponges.
 - ▶ Clean the appliance with nothing but water and a soft, damp cloth.

en Environmental protection and saving energy

- ▶ Remove all detergent residue, spray residue or other residues immediately if they come into contact with the appliance.

Environmental protection and saving energy

Disposing of packaging

The packaging materials are environmentally compatible and can be recycled.

- ▶ Sort the individual components by type and dispose of them separately.

Save energy and conserve resources

If you follow these instructions, your appliance will use less electricity and less water.

Choose programmes with low temperatures and longer wash times and use "maximum load capacity"

→ *Page 29*.

- + Energy consumption and water consumption is most efficient.

Use the economy programme settings.

- + If you adjust the programme settings for a programme, the display shows the expected consumption.

"Add " → *Page 38* detergent based on the laundry's degree of soiling.

- + For light to normal soiling, a smaller amount of detergent is sufficient. Observe the dosage recommendation from the detergent manufacturer.

Reduce the washing temperature for lightly and normally soiled laundry.

- + At low temperatures, the appliance consumes less energy. For light to normal soiling, lower temperatures than indicated on the care label are also sufficient.

Set the maximum spin speed if you want to dry the laundry in a tumble dryer afterwards.

- + The drier the laundry, the shorter the programme duration when drying which, in turn, reduces energy consumption. A higher spin speed reduces the residual moisture in the laundry and increases the volume of the spin noise.

Wash the laundry without prewash.

- + Washing with prewash increases the programme duration and increases energy and water consumption.

The appliance has a continuous automatic load adjustment function.

- + Depending on the type of fabric and load capacity, the continuous automatic load adjustment function optimally adjusts the water consumption and programme duration.

The appliance comes with an Aqua-Sensor.

- + During the rinse cycle, the Aqua-Sensor checks the degree of turbidity of the rinsing water, and adjusts the duration and number of rinse cycles accordingly.

Energy saving mode

If you do not use the appliance for an extended period, it automatically switches to energy-saving mode. All displays go out and  flashes. Energy-saving mode ends when you use the appliance again, e.g. if you open or close the door.

Installation and connection

Unpacking the appliance

Note: Please read the information in the "Safety" → *Page 4* and "Preventing material damage" → *Page 11* sections to ensure that you use the appliance safely.

ATTENTION!

Objects remaining in the drum that are not designed for operation with the appliance may cause material damage and damage to the appliance.

► Remove these objects, along with all supplied accessories, from the drum before starting the appliance.

1. Remove any packaging and protective covers completely from the appliance.

For the environmentally friendly disposal of the packaging materials, observe the information on the topic of

→ *"Disposing of packaging"*, *Page 12*.

2. Check the appliance for visible damage.
3. Open the door.
→ *"Basic operation"*, *Page 39*
4. Remove the accessory from the drum.
5. Close the door.

Contents of package

After unpacking all parts, check for any damage in transit and completeness of the delivery.

1	Washing machine
2	Accompanying documents
3	Water inlet hose
4	Cover caps
5	Connection adapter

Requirements for the installation location

The appliance may "wander" when it spins. Observe the instructions for the installation location.

Note: Please read the information in the "Safety" → *Page 4* and "Preventing material damage" → *Page 11* sections to ensure that you use the appliance safely.

⚠ WARNING

Risk of electric shock!

The appliance contains live parts. Touching live parts is dangerous.

- ▶ Do not operate the appliance without a cover cap.

⚠ WARNING

Risk of injury!

When using the appliance on a base, the appliance may tip over.

- ▶ Always secure the feet of the appliance to a base using the manufacturer's "fixing brackets" → *Page 35* before using the appliance for the first time.

ATTENTION!

- If the appliance is installed in areas exposed to frost or outdoors, frozen residual water may damage the appliance and frozen hoses may crack or split.
 - ▶ Do not install or operate this appliance anywhere that is liable to experience frost and/or outdoors.
- The appliance underwent a function test before leaving the factory and may, therefore, contain residual water. This residual water may leak out if the appliance is tilted at an angle greater than 40°.
 - ▶ Tilt the appliance carefully.

Installation location	Requirements
On a base 	Secure the appliance with "fixing brackets" → <i>Page 35</i> .

Installation location	Requirements
On a wooden joist floor 	Place the appliance on a water-resistant wooden board which is screwed tightly to the floor. The wooden board should be at least 30 mm thick.
In a kitchen unit 	<ul style="list-style-type: none"> ■ A niche width of 60 cm is required. ■ Only install the appliance underneath a continuous worktop that is securely connected to adjacent cabinets.
On a wall 	Do not trap the hoses between the wall and the appliance.

Removing the transit bolts

The appliance is secured for transportation using transit bolts on the rear of the appliance.

Notes

- Please read the information in the "Safety" → *Page 4* and "Preventing material damage" → *Page 11* sections to ensure that you use the appliance safely.
- Keep the transit bolts, screws and sleeves in a safe place for future "transport" → *Page 66*.

en Installation and connection

1. Pull the hoses out of the holders.

2. Unscrew ① and remove ② all four screws for the transit bolts with a WAF 13 wrench.

3. Pull the power cord out of the holder.

4. Remove the four sleeves.

5. Put on the four cover caps.

6. Press down on the four cover caps.

Connecting the appliance

Connect your appliance to the power supply, water inlet and water outlet.

Connecting the water inlet hose

Note

- Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Connect the water inlet hose.

2. Connect the water inlet hose to a tap (26.4 mm = 3/4").

3. When connecting to a 21 mm = 1/2" tap, first fit the adapter with a sealing washer.

4. Open the water tap carefully and check that the connection points are tight.

Water outlet connection types

This information is intended to help you to connect this appliance to the water outlet.

Note: Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

ATTENTION!

When draining, the water outlet hose is subject to water pressure and may come loose from the installed connection point.

- Secure the water outlet hose against unintentional loosening.

Note: Observe the draining heights. The maximum draining height is 100 cm.

Drainage into a siphon

Secure the connection point with a (24–40 mm) hose clamp.

Drainage into a wash-basin

Fix and secure the water outlet using an "elbow." → Page 35

Drainage into a plastic pipe with rubber sleeve or into a gully.

Fix and secure the water outlet using an "elbow." → Page 35

Aligning the appliance

In order to reduce noise and vibration and to prevent the appliance from moving, align the appliance correctly.

Note: Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Loosen the lock nuts using a WAF 17 wrench by turning it in a clockwise direction.

2. To align the appliance, turn the appliance feet. Check that the appliance is level using a spirit level.

All appliance feet must stand firmly on the ground.

3. Screw the lock nuts tightly against the housing using a WAF 17 wrench.

In doing so, hold the foot tight and do not adjust its height.

Connecting the appliance to the electricity supply

Note: Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Insert the mains plug of the appliance's power cable in a socket nearby.

The connection details of the appliance can be found under "Technical data" → *Page 69*.

2. Check the mains plug is inserted properly.

Familiarising yourself with your appliance

Appliance

You can find an overview of the parts of your appliance here.

On certain models, specific details such as the colour and shape may differ from those pictured.

1	"Maintenance flap for the drain pump" → Page 51
2	Door
3	"Detergent drawer" → Page 21
4	"Controls" → Page 21
5	"Water outlet hose" → Page 17
6	"Power cord" → Page 18
7	"Transit bolts" → Page 15

Detergent drawer

| 1 | Manual dosing compartment |
| 2 | ⊗ / ∇ : Dispenser for fabric softener or detergent |
| 3 | ∇ : Dispenser for detergent |

Controls

You can use the control panel to configure all functions of your appliance and to obtain information about the operating status.

- | | |
|----------|---|
| 1 | "Programmes" → Page 29 |
| 2 | "Programme selector" → Page 39 |
| 3 | "Buttons" → Page 26 and "display" → Page 23 |

Operating logic

Some areas of the display respond to touch. You can activate settings by pressing the buttons. The activated settings are highlighted brightly on the display. You can change or deactivate

en Familiarising yourself with your appliance

tivate the activated settings by repeatedly pressing on the relevant buttons on the display.

ATTENTION!

Pressing on the display with force may cause damage.

- ▶ Do not apply heavy pressure on the display.
- ▶ Do not press on the display using pointed or sharp objects.

Display

The display shows the current settings, options or relevant information.

Display	Designation	Description
0:40 ¹	Programme duration/ programme time re- maining	Approximate expected programme duration or pro- gramme time remaining.
⌚ 10 ¹	"Ready in" time	The programme end has been set and the remaining number of hours is displayed. → "Buttons", Page 26

Accessories

Use original accessories. These have been made especially for your appliance.

	Use	Order number
Pedestal with drawer	Install the appliance at a raised height so that it can be easily loaded and unloaded. A laundry basket for transporting the laundry has been integrated into the drawer.	WMZ20490
Fixing brackets	Improves the stability of the appliance.	WMZ2200
Elbow	Secure the water outlet hose in place.	00655300
Anschlussventil	Anschlussventil als Sicherheitsrichtung gegen Rückfließen von Wasser in das Leitungsnetz.	10015611

Before using for the first time

Prepare the appliance for use.

Starting an empty washing cycle

Your appliance was inspected thoroughly before leaving the factory. To remove any residual water, run the first wash cycle without any laundry.

Note: Please read the information in the "Safety" → *Page 4* and "Preventing material damage" → *Page 11* sections to ensure that you use the appliance safely.

1. Press .

It may take a few seconds for the appliance to switch on.

2. Set the **Bomull 90 °C** programme.
3. Close the door.

4. Pull out the detergent drawer.

5. Add washing powder to the manual dosing compartment.

To prevent foaming, use only half of the amount of detergent recommended by the detergent manufacturer for light soiling. Do not use detergent suitable for woollens or delicates.

6. Push in the detergent drawer.

7. Press  (Start/Pause) to start the programme.

✓ The display shows the remaining programme duration.

8. Start the first wash cycle or press  to switch off the appliance.

→ "Basic operation", Page 39

Laundry

You can wash all items that the manufacturer has marked as machine-washable on the care label and fabrics made from hand-washable wool using your appliance.

Preparing the laundry

ATTENTION!

Objects remaining in the laundry may damage the laundry and the drum.

- ▶ Remove all items from any pockets in your laundry before using the appliance.
- ▶ To protect your appliance and the laundry, prepare the laundry beforehand.
 - Empty all pockets
 - Brush sand out of all collars and pockets
 - Close bed covers and cushion covers
 - Close all zips, Velcro fasteners, hooks and eyes
 - Tie cloth belts and apron strings together or use a mesh laundry bag
 - Remove curtain hooks and lead strips or use a mesh laundry bag
 - Use a mesh laundry bag for small items of laundry such as children's socks
 - Separate items of laundry and shake them out

- Wash large and small items of laundry together
- Dab fresh stains with soapy water (do not rub them)
- Some stubborn or dried-in stains can be removed by washing several times

- ▶ To improve washing results and prevent discolouration, sort the laundry according to the following criteria before washing.
 - Type of fabric and fibre type
 - Whites
 - Colours
 - Wash new coloured items separately the first time you wash them.
 - "Soiling" → Page 37
 - "Care symbols on the care labels" → Page 37

Sorting laundry

Note: Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

Degrees of soiling

Degree of soiling	Soiling	Examples
Light	<ul style="list-style-type: none"> ■ No dirt or stains are visible ■ Laundry has absorbed odours 	Light summer clothing or sports clothing that has been worn for a just a few hours
Normal	Dirt or light stains are visible	<ul style="list-style-type: none"> ■ T-shirts, shirts or blouses are sweat-soaked or have been worn a few times ■ Towels or bedding that has been used for up to one week
Heavy	Dirt or stains are clearly visible	Tea towels, baby items or work clothing

Care symbols on the care labels

The symbols indicate the recommended programme and the numbers in the symbols indicate the maximum recommended washing temperature.

Symbol	Washing process	Recommended programme
	Normal	Cottons
	Gentle	Easy Care
	Particularly gentle	Delicates/Silk for washing by hand
	Hand wash	Wool
	Not suitable for machine-washing	-

Tip: You can find more information about care symbols at www.gine-tex.ch.

Detergents and care products

You can protect your appliance and your laundry by selecting and using the correct detergents and care products. You can use all detergents and care products which are suitable for domestic washing machines.

Note: Please read the information in the "Safety" → *Page 4* and "Preventing material damage" → *Page 11* sections to ensure that you use the appliance safely.

The manufacturer's instructions for use and dosage can be found on the packaging.

Detergent recommendation

Detergent	Laundry	Programme	Temperature
Standard detergent with optical brighteners	Heat-resistant white fabrics made from cotton or linen	Cotton	From cold up to 90 °C
Detergent for colours without bleach or optical brighteners	Coloured fabrics made from linen or cotton	Cotton	From cold up to 60 °C
Detergent for colours/delicates without optical brighteners	Coloured fabrics made from easy-care fabrics or synthetic materials	Easy Care	From cold up to 60 °C
Detergent for delicates	Delicate fine textiles, silk or viscose	Delicates/Silk	From cold up to 40 °C
Detergent for woollens	Wool	Wool	From cold up to 40 °C

Tip: Visit www.cleanright.eu to find further information on detergents, care products and cleaning agents for domestic use.

Detergent dosage

Use the correct detergent dosage to achieve optimal washing results and save resources.

The detergent dosage depends on:

- The amount of laundry

Notes

- only use liquid detergents that are self-flowing
- Do not mix different liquid detergents
- Do not mix detergent and fabric softener
- Do not use products that have expired or are highly congealed.
- Do not use products containing solvents, caustic agents or volatile substances (e.g. bleach)
- Use dyes sparingly as salt may damage stainless steel
- Do not use bleaching agents in the appliance

You can find out how hard your water is from your local water company or measure it yourself using a water hardness tester.

Water hardness

Hardness range	Total hardness in mmol/l	German degrees in °dH
soft (I)	0–1.5	0–8.4
medium (II)	1.5– 2.5	8.4–14
hard (III)	over 2.5	over 14

Example of a manufacturer's instructions for detergent

These example values refer to a standard load of 4–5 kg.

Soiling	Light	Normal	Heavy
Water hardness: Soft/medium	40 ml	55 ml	80 ml
Water hardness: Hard/very hard	55 ml	80 ml	105 ml

The dosages can be found on the manufacturer's packaging.

- If you are not using manual dosage, adjust the dosage to the actual load.
- If intelligent dosing is activated, do not adjust the dosage to the actual load capacity. The quantity of detergent and fabric softener is automatically calculated via the "basic dosage" → *Page 43* and the amount of laundry detected. The basic dosage setting must always comply with the dosage for a load of 4.5 kg.

Basic operation

Switching on the appliance

- ▶ Press .

It may take a few seconds for the appliance to switch on.

- ✓ The appliance performs an audible function test in the detergent drawer.

Setting a programme

1. Set the programme selector to the required "programme" → *Page 29*.

2. If necessary, "adjust the programme settings" → *Page 40*.

Adjusting the programme settings

Depending on the programme and programme progress, you can adjust or activate/deactivate the settings.

Note: Overview of all programme settings:

Requirement: A programme has been set.

- ▶ Adjust the programme settings.
The programme settings are not saved permanently for the programme.

Note: The setting is saved if you activate or deactivate the intelligent dosing system.

Saving the programme settings

You can save your individual programme settings as favourites.

Requirements

- A programme has been set.
- The programme settings have been adjusted.

- ▶ Press and hold ☆ for approx. 3 seconds.
Press ☆ to call up the saved programme.

Note: To overwrite the saved programme, repeat the steps above.

Loading laundry

Notes

- Please read the information in the "Safety" → *Page 4* and "Preventing material damage" → *Page 11* sections to ensure that you use the appliance safely.
- To prevent creasing, take note of the maximum load for the relevant "programme" → *Page 29*.

Requirement: Prepare and sort the laundry.

→ "*Laundry*", *Page 36*

1. Open the door.

2. Ensure that the drum is empty.
3. Separate the laundry and place it in the drum.
4. **Note:** Ensure that there is no laundry trapped in the door.
Close the door.

Adding detergent and care product

For programmes in which intelligent dosing is not possible or desirable, you can add detergent to the manual dosing compartment.

Note: Please read the information in the "Safety" → *Page 4* and "Preventing material damage" → *Page 11* sections to ensure that you use the appliance safely.

Tip: In addition to intelligent dosing, you can also add additional care product for laundry, e.g. stain remover, starch or bleach, to the manual dosing compartment. Do not add any additional detergent to the manual dosing compartment to avoid overdosage and/or foaming.

Requirement: Find out the optimum dosage for "detergent and care product." → *Page 38*

1. Pull out the detergent drawer.
2. Pour in detergent.
→ *"Detergent drawer", Page 21*
3. If required, add the care product.
4. Push in the detergent drawer.

Starting the programme

Note: If you want to change the time until the programme ends, set the "Ready in" time first.

- ▶ Press .
- ✓ The display shows either the programme duration or the "Ready in" time.

Adding laundry

Note: Please read the information in the "Safety" → *Page 4* and "Preventing material damage" → *Page 11* sections to ensure that you use the appliance safely.

1. Press .

The appliance is paused and checks whether it is possible to add or remove laundry. Take note of the programme status.

2. Add or remove laundry.
3. Close the door.
4. Press .

Cancelling the programme

Once the programme has started, you can cancel it at any time.

Note: Please read the information in the "Safety" → *Page 4* and "Preventing material damage" → *Page 11* sections to ensure that you use the appliance safely.

1. Press .
2. Open the door.

The appliance door remains locked for safety reasons if the temperature and water levels are high.

- If the temperature is high, start the **Sköljning** programme.
- If the water level is high: Start the **Centrif.** or **Urpumpning** programme.

3. Remove the laundry.

Unloading the laundry

Note: Please read the information in the "Safety" → *Page 4* and "Preventing material damage" → *Page 11* sections to ensure that you use the appliance safely.

1. Open the door.

en Childproof lock

2. Remove the laundry.

Switching off the appliance

1. Press ①.

2. Turn off the tap.
3. Wipe the rubber gasket dry and remove any foreign objects.

4. Leave the door and detergent drawer open so that residual water can evaporate.

Childproof lock

Secure your appliance against being operated unintentionally using the controls.

Activating the childproof lock

- ▶ Press and hold  **3s** for approx. 3 seconds.
- ✓ The controls are locked.
- ✓ The childproof lock remains active even after the appliance has been switched off.

Deactivating the childproof lock

Requirement: To deactivate the childproof lock, the appliance must be switched on.

- ▶ Press and hold  **3s** for approx. 3 seconds.

Intelligent dosing system

Your appliance has an intelligent dosing system for liquid detergent and fabric softener.

The optimum quantities of liquid detergent and fabric softener are dispensed automatically depending on the programme and settings.

Filling the dispenser

Note

In order to use intelligent dosing, fill the dispenser.

- Fill the dispenser only with suitable "detergent and care products"
→ Page 38.
- If you change the liquid detergent or fabric softener, empty and clean the dispenser beforehand.
→ "Cleaning the detergent drawer", Page 49

- If you want to use both dispensers for liquid detergent, adjust the "contents of the dispenser"
→ Page 43.

Requirement: ◊ / ⊗ flashes.

1. Pull out the detergent drawer.
2. Open the dispenser lid.

3. Pour liquid detergent ◊ and fabric softener ⊗ into the relevant dispensers.
→ "Detergent drawer", Page 21

4. Close the dispenser lid.

Note: To prevent the detergent from drying out or drying up, do not leave the dispenser lid open for a long period of time.

5. Push in the detergent drawer.
6. Adjust the "basic dosage"
→ Page 43.

Dispenser contents

When it leaves the factory, the dispenser is set for fabric softener ⊗. Alternatively, you can also use this dispenser for a second liquid detergent ◊.

Notes

- If you change the content of the dispenser, the basic dosage for this dispenser is reset.
- If you use both dispensers for liquid detergent, you must select a dispenser which is to be used during washing.

Adjusting the dispenser contents

1. Press and hold  **i-DOS** for approx. 3 seconds.
2. To set ◊, press  **i-DOS**.
✓ The display shows ◊.
3. To set ⊗, press  **i-DOS** again.
4. To end the setting process, wait briefly.

Basic dosage

You can adjust the preset basic dosages for liquid detergent and fabric softener.

The basic dosage depends on the manufacturer's instructions for the detergent, the water hardness and the degree of soiling of the laundry.

Always set a basic dosage that corresponds to the dosage for a standard load of 4.5 kg.

→ "Detergent dosage", Page 38

Adjusting the basic dosage

You can individually adjust the basic dosages for each dispenser.

1. Press and hold  **i-DOS** for approx. 3 seconds.
✓ The display shows the basic dosage set for ◊.
2. To adjust the setting, press **- / +**.

3. To end the setting process, wait briefly.

Note: To adjust the basic dosage for ☼, repeat the steps with ⏏ i-DOS.

Home Connect

This appliance is network-capable. Connecting your appliance to a mobile device lets you control its functions via the Home Connect app, adjust its basic settings and monitor its operating status.

The Home Connect services are not available in every country. The availability of the Home Connect function depends on the availability of Home Connect services in your country. You can find information about this at: www.home-connect.com.

- → "Connecting the appliance to a WLAN home network (Wi-Fi) with WPS function", Page 44
- → "Connecting the appliance to a WLAN home network (Wi-Fi) without WPS function", Page 45

The Home Connect app guides you through the entire login process. Follow the instructions in the Home Connect app to configure the settings.

Tips

- Please consult the documents supplied by Home Connect.
- Please also follow the instructions in the Home Connect app.

Notes

- Please note the safety precautions in this instruction manual and make sure that they are also observed when operating the appliance via the Home Connect app.
→ "Safety", Page 4

- Operating the appliance on the appliance itself always takes priority. During this time it is not possible to operate the appliance using the Home Connect app.

Home Connect settings

Adapt Home Connect to your needs. You can find the Home Connect settings in the basic settings for your appliance. Which settings the display shows will depend on whether Home Connect has been set up and whether the appliance is connected to your home network.

Connecting the appliance to a WLAN home network (Wi-Fi) with WPS function

Using your router's WPS function is the simplest way to connect the appliance to your home network.

Requirement: If your router has a WPS function, you can connect the appliance to your WLAN home network (Wi-Fi) automatically.

1. Press and hold  for approx. 3 seconds.
 - ✓ The display shows **Aut.**
2. Press .
3. Press the WPS button on the router within the next 2 minutes.

Take note of the information in the documents for your router.

 - ✓  flashes in the display.
 - ✓ The appliance attempts to connect to your WLAN home network.
 - ✓ If the display shows **con** and  lights up permanently, the appliance is connected to the home network.

4. If the display shows Home Connect Error, the appliance is not connected to the home network.
 - Check whether your appliance is in range of your home network.
 - Reconnect the appliance to the WLAN home network (Wi-Fi) with WPS function.
5. "Connect your appliance to the Home Connect app." → Page 46

Connecting the appliance to a WLAN home network (Wi-Fi) without WPS function

If your router does not have a WPS function, you can connect the appliance to your WLAN home network (Wi-Fi) manually. The appliance quickly sets up its own Wi-Fi network. You can connect a mobile device to the WLAN network and transfer the network information for the WLAN home network (Wi-Fi) to your appliance.

Requirement: The Home Connect app is open and you have logged on.

1. Press and hold  for at least 3 seconds.
 - ✓ The display shows **Aut.**
2. Set the programme to position 2.
 - ✓ The display shows **SAP.**
3. Press .
- ✓  flashes in the display.

- ✓ The appliance now sets up its own Wi-Fi network with the name (SSID) HomeConnect.

4. Call up the Wi-Fi settings on the mobile device.

Connect the mobile device to the Home Connect Wi-Fi network and enter the password (key) HomeConnect.
- ✓ Your mobile device now connects to the appliance. The connection process may take up to 60 seconds.

5. Open the Home Connect app on your mobile device and carry out the steps in the app.
6. In the Home Connect app, enter the network name (SSID) and password (key) for your home network.

7. Carry out the steps in the Home Connect app to connect the appliance.
 - ✓ If the display shows **con** and  lights up permanently, the appliance is connected to the home network.
8. If the display shows Home Connect Error, the appliance is not connected to the home network.
 - Check whether your appliance is in range of your home network.
 - Reconnect the appliance to the WLAN home network (Wi-Fi) with WPS function.
9. "Connect your appliance to the Home Connect app" → *Page 46*.

Connecting your appliance to the Home Connect app

Requirements

- The appliance is connected to the WLAN home network (Wi-Fi).
 - The Home Connect app is open and you have logged on.
1. Set the programme to position 3.
 - ✓ The display shows **APP**.
 2. Press  .
 - ✓ The appliance connects to the Home Connect app.
 3. Once your appliance is displayed in the Home Connect app, carry out the last steps in the Home Connect app.
 - ✓ If the display shows **con**, the appliance is connected to the Home Connect app.

Activating Wi-Fi on the appliance

Note: When Wi-Fi is activated, the energy consumption increases in comparison to the values specified in the consumption value table.

1. Press and hold  for approx. 3 seconds.
2. Set the programme to position 4.
 - ✓ The display shows **Con**.
3. Press   repeatedly until the display shows **on**.
 - ✓ Wi-Fi is activated.

Deactivating Wi-Fi on the appliance

1. Press and hold  for at least three seconds.
2. Set the programme to position 4.
 - ✓ The display shows **Con**.
3. Press   repeatedly until the display shows **off**.
 - ✓ Wi-Fi is deactivated.

Note: If Wi-Fi is switched off and your appliance was previously connected to your home network, this connection will be re-established automatically when Wi-Fi is switched back on.

Software update

Requirement: The display shows .

1. Press and hold  for approx. 3 seconds.
2. Set the programme to position 6.
 - ✓ **UPd** appears on the display.
3. Press .
- ✓ The software update is installed.
- ✓ If **End** is shown on the display, the software update is installed.

Note: The software update may take several minutes. Do not switch off the appliance while the software update is in progress.

Resetting the appliance network settings

1. Press and hold  for at least 3 seconds.

2. Set the programme to position 5.
 - ✓ The display shows **rES**.
3. Press **D**.
 - ✓ The display shows **Yes**.
4. Press **D**.
 - ✓ The network settings are reset.
 - ✓ If **End** is shown on the display, the network settings are reset.

Tip: If you wish to operate your appliance again via the Home Connect app, you will need to reconnect it to the Wi-Fi and to the Home Connect app.

Data protection

Please see the information on data protection.

The first time your appliance is registered on a home network connected to the Internet, your appliance will transmit the following types of data to the Home Connect server (initial registration):

- Unique appliance identification (consisting of appliance codes as well as the MAC address of the Wi-Fi communication module installed).
- Security certificate of the Wi-Fi communication module (to ensure a secure data connection).
- The current software and hardware version of your appliance.
- Status of any previous reset to factory settings.

This initial registration prepares the Home Connect functions for use and is only required when you want to use the Home Connect functions for the first time.

Note: Please note that the Home Connect functions can only be utilised with the Home Connect app. Information on data protection can be retrieved in the Home Connect app.

Basic settings

You can configure the appliance to meet your needs.

Overview of the basic settings

Below is an overview of the basic settings on your appliance.

Basic setting	Symbol	Value	Description
End signal		0 (off) 1 (quiet) 2 (medium) 3 (loud) 4 (very loud)	Set the volume of the signal at the end of the programme.
Button signal		0 (off) 1 (quiet) 2 (medium) 3 (loud) 4 (very loud)	The volume of the audible signal emitted when the buttons are pressed.
Display brightness		1 (low) 2 (medium) 3 (high) 4 (very high)	Set the display brightness.

Changing the basic settings

1. In order to set the basic settings, press the  button.
2. To set the required basic setting, press the  button.
- ✓ The display shows the set basic setting and the current value.
3. To change the value, press **- / +**.
4. To exit the basic settings, switch off the appliance.

Cleaning and servicing

To keep your appliance working efficiently for a long time, it is important to clean and maintain it carefully.

Tips on appliance care

Follow the tips for appliance care to ensure your appliance works correctly in the long term.

Wipe down the housing and the control panel with nothing but water and a damp cloth.	The appliance parts remain clean and hygienic.
Remove all detergent residue, spray residue or other residues immediately.	Fresh deposits are easier to remove without leaving any residue.

Keep the appliance door and detergent drawer open after use.

This allows the residual water to dry, reducing odours in the appliance.

Cleaning the drum

If you often wash at a washing temperature of 40 °C and lower or the appliance has not been used for a long period, clean the drum.

⚠ CAUTION **Risk of injury!**

Permanently washing at low temperatures and a lack of ventilation for the appliance may damage the drum and cause injury.

- ▶ Regularly run a programme for cleaning the drum or wash at temperatures of at least 60 °C.
- ▶ Leave the appliance to dry after every operation with the door open, and leave the detergent drawer to dry.
- ▶ Run the **Bomull 90 °C** programme without laundry. Add washing powder.

Cleaning the detergent drawer

If you change detergent or the detergent drawer is dirty, clean the detergent drawer and the pump unit of the intelligent dosing system.

Note: Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Switch off the appliance.
2. Pull out the detergent drawer.

3. Press down on the insert and remove the detergent drawer.

4. Remove the pump unit.

5. Unclip the detergent drawer lid and remove it.

en Cleaning and servicing

6. Empty the detergent drawer.

7. **ATTENTION!** The pump unit contains electrical components.

- ▶ Do not clean the pump unit in the dishwasher and do not immerse it in water.
- ▶ Protect the electrical connection on the rear against water, detergent and fabric softener residue. Clean the pump unit with a damp cloth.

8. Clean the detergent drawer and the lid with a soft, damp cloth or hand shower.

9. Dry the detergent drawer, lid and pump unit and reinsert them.

10. Clean the inside of the detergent drawer housing.

11. Push in the detergent drawer.

Descaling

If you add detergent correctly, you do not need to descale your appliance. If you still wish to use descaler, follow the manufacturer's instructions for use.

ATTENTION!

The use of unsuitable descaling agents, e.g. for coffee machines, may damage the appliance.

- ▶ For this appliance, only use descaling agents that are available from the manufacturer's website or our after-sales service.

Cleaning the drain pump

Clean the drain pump in the event of faults, e.g. blockages or rattling noises.

Emptying the drain pump

Note: Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Turn off the water tap.
2. Switch off the appliance.

3. Disconnect the appliance's mains plug from the power supply.
4. Open the maintenance flap.

5. Remove the maintenance flap.

6. Slide a sufficiently large receptacle under the opening.

en Cleaning and servicing

7. Take the drain hose out of the holder.

8. **⚠ CAUTION - Risk of scalding!**

When you wash at high temperatures, the detergent solution gets hot.

- ▶ Do not touch the hot detergent solution.

To allow the detergent solution to flow out into the container, remove the sealing cap.

9. Firmly press on the sealing cap.

10. Insert the drain hose into the holder.

Cleaning the drain pump

Note: Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

Requirement: "The drain pump is empty." → Page 51

1. Since water may remain in the drain pump, remove the pump cap carefully.

- Clean the interior, the thread on the pump cap and the pump housing.

- Make sure that the impeller in the drain pump can be rotated.
- Insert the pump cap and screw it on as far as it will go.

The handle on the pump cap must be in a vertical position.

- Insert the maintenance flap and lock it into place.

- Close the maintenance flap.

Cleaning the water outlet hose at the siphon

If the water outlet hose at the siphon is dirty or the detergent solution is not being pumped out, you must clean these.

- Switch off the appliance.
- Disconnect the appliance's mains plug from the power supply.
- Loosen the hose clamp and carefully remove the water outlet hose.

Residual water may leak out.

- Clean the water outlet hose and siphon connecting piece.

en Cleaning and servicing

5. Reattach the water outlet hose and secure the connection point using the hose clamp.

Clean the water inlet filters.

Clean the filter in the water inlet in the event of blockages or if the water pressure is too low.

Emptying the water inlet hose

1. Turn off the tap.
2. Set the **Bomull** programme.
3. Start the programme and leave it to run for approx. 70 seconds.
4. Switch off the appliance.
5. Disconnect the appliance's mains plug from the power supply.

Cleaning the filter on the tap

Note: Please read the information in the "Safety" → *Page 4* and "Preventing material damage" → *Page 11* sections to ensure that you use the appliance safely.

Requirement: The water inlet hose is empty.

1. Remove the water inlet hose from the tap.

2. Clean the filter with a small brush.

3. Connect the water inlet hose and check for leaks.

Cleaning the filter on the appliance

Note: Please read the information in the "Safety" → *Page 4* and "Preventing material damage" → *Page 11* sections to ensure that you use the appliance safely.

Requirement: The water inlet hose is empty.
 → "Emptying the water inlet hose",
 Page 54

1. Disconnect the hose from the rear of the appliance.

2. Use pliers to remove the filter.

3. Clean the filter with a small brush.

4. Reinsert the filter.

5. Connect the hose and check for leaks.

Troubleshooting

You can rectify minor faults on your appliance yourself. Read the troubleshooting information before contacting after-sales service. This will avoid unnecessary costs.

WARNING

Risk of electric shock!

Incorrect repairs are dangerous.

- ▶ Repairs to the appliance should only be carried out by trained specialist staff.
- ▶ Only use genuine spare parts when repairing the appliance.
- ▶ If the power cord of this appliance is damaged, it must be replaced by the manufacturer, the manufacturer's Customer Service or a similarly qualified person in order to prevent any risk.

Water is leaking out at the water inlet hose.	Water inlet hose is not correctly/securely connected.	<ol style="list-style-type: none"> 1. Connect the water supply hose correctly. Connecting the water inlet hose 2. Tighten the screw connection.
Water is leaking out at the water outlet hose.	The water outlet hose is damaged.	<ul style="list-style-type: none"> ▶ Replace the damaged water outlet hose.
	Water outlet hose is not connected correctly.	<ul style="list-style-type: none"> ▶ Connect the water outlet hose correctly. Water outlet connection types
Odours have formed in the appliance.	Humidity and detergent residue may promote the formation of bacteria.	<ul style="list-style-type: none"> ▶ → <i>"Cleaning the drum", Page 49</i> ▶ If you are not using the appliance, leave the door and detergent drawer open so that residual water can evaporate.

Emergency release

To remove the laundry in the event of a power failure, for example, you can manually release the door.

Releasing the door

Requirement: "The drain pump is empty." → *Page 51*

1. **ATTENTION!** Escaping water may cause material damage.
 - ▶ Do not open the door if you can see water through the glass.
Pull the emergency release downwards with a tool and release.

- ✓ The door lock is released.
2. Insert the maintenance flap and lock it into place.
3. Close the maintenance flap.

Transportation, storage and disposal

You can find out here how to prepare your appliance for transportation and storage. You will also find out how to dispose of old appliances.

Removing the appliance

1. Turn off the tap.
2. → *"Emptying the water inlet hose", Page 54.*
3. Switch off the appliance.

4. Unplug the appliance's mains plug.
5. Drain the remaining detergent solution.
→ *"Cleaning the drain pump", Page 51*
6. Detach the hoses.
7. Empty the dispensers.

Inserting the transit bolts

Secure the appliance for transportation using transit bolts in order to prevent damage.

1. Remove the four cover caps.
 - If necessary, use a screwdriver to remove the cover caps.

Keep the cover caps.

2. Insert the four sleeves.

3. Insert all screws into the four transit bolts and tighten slightly.

4. Insert the power cord into the holder ① and tighten all four screws for the transit bolts with a WAF 13 wrench ②.

5. Insert the hose into holder.

Using the appliance again

- ▶ Remove the transit bolts.

Disposing of old appliance

Valuable raw materials can be re-used by recycling.

⚠ WARNING **Risk of harm to health!**

Children can lock themselves in the appliance, thereby putting their lives at risk.

- ▶ Do not install the appliance behind a door as this may obstruct the appliance door or prevent it from opening.
- ▶ With redundant appliances, unplug the power cord. Then cut through the cord and damage the lock on the appliance door beyond repair so that the appliance door will no longer close.

1. Unplug the appliance from the mains.
2. Cut through the power cord.
3. Dispose of the appliance in an environmentally friendly manner.

Information about current disposal methods are available from your specialist dealer or local authority.

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

Customer Service

If you have any queries on use, are unable to rectify faults on the appliance yourself or if your appliance needs to be repaired, contact Customer Service.

You can solve many problems yourself by consulting the information on troubleshooting in these instructions or on our website. If this is not the case, contact our after-sales service. With any warranty claims, we will make sure that your appliance is repaired by trained after-sales technicians using genuine spare parts, including after the manufacturer's warranty has expired.

Detailed information on the warranty period and terms of warranty in your country is available from our after-sales service, your retailer or on our website.

If you contact Customer Service, you will require the product number (E-Nr.) and the production number (FD) of your appliance.

The contact details for Customer Service can be found in the enclosed Customer Service directory or on our website.

Product number (E-Nr.) and production number (FD)

You can find the product number (E-Nr.) and the production number (FD) on the appliance's rating plate.

Depending on the model, the rating plate is located:

- On the inside of the door.
- On the inside of the maintenance flap.
- On the rear of the appliance.

Make a note of your appliance's details and the Customer Service telephone number to find them again quickly.

Consumption values

The following information is provided in accordance with the EU Ecodesign Regulation. The values given for programs other than the **Eco 40-60** are indicative only and were determined in accordance with the applicable standard EN60456. The automatic dosing function has been deactivated for this purpose.

Note on the comparison test: Deactivate the automatic dosing function unless this function is the object of the test.

Programme	Load (kg)	Pro-gramme duration (hr:min) ¹	Energy consumption (kWh/cycle) ¹	Water consumption (l/cycle) ¹	Maximum temperature (°C) 5 mins ¹	Spin speed (rpm) ¹	Residual moisture (%) ¹
Eco 40-60 ²	9,0	3:37	1,245	61,0	49	1400	50
Eco 40-60 ²	4,5	2:52	0,590	45,0	38	1400	50
Eco 40-60 ²	2,5	2:33	0,195	30,0	24	1400	54
Bomull 20 °C	9,0	3:28	0,370	90,0	23	1400	52
Bomull 40 °C	9,0	3:28	1,350	90,0	45	1400	52
Bomull 60 °C	9,0	3:28	1,450	90,0	55	1400	52
Bomull 40 °C + ↓	9,0	3:58	1,400	102,0	45	1400	52
Syntet 40 °C	4,0	2:28	0,780	61,0	44	1200	27
Snabb/Mix 40 °C	4,0	0:59	0,620	44,0	41	1400	53
☼ Ylle/ Handtvätt 30 °C	2,0	0:40	0,200	40,0	22	800	25

¹ Due to the influence of water pressure, hardness and inlet temperature, ambient temperature, type, amount and soiling of laundry, detergent used, fluctuations in the power supply and the selected additional functions, the actual values may deviate from the stated values.

² Test programme in accordance with the EU Ecodesign Directive and the EU Energy Labelling Regulation with cold water (15 °C).

Technical specifications
