

## **SMEG MILK FROTHER, THE PERFECT FOAM**

*You don't need a professional barista to achieve the perfect foam: MFF01 is the new small appliance for preparing hot and cold drinks to rival even the best coffee shop in an instant.*

The new **MFF01 Smeg milk frother**, designed by Matteo Bazzicalupo and Raffaella Mangiarotti (deepdesign), is a dream come true for anyone who likes a smooth start to the day. Enjoy a rich latte macchiato, a tasty mocha, or on those hot summer days, a creamy iced frappé, in the comfort of your own kitchen with the help of this **sophisticated, stylish and easy-to-use appliance**.

The MFF01 is a milk frother unlike any other. Its unmistakable **style** makes it a cult accessory, designed to take pride of place in the kitchen like a sought-after piece of furniture. The **rounded lines of the steel body**, which is available in various different colours, are highlighted by the shiny chrome finishes and the **stainless-steel jug**.

A genuine design piece which boasts the latest technology, it is equipped with **6 different automatic programmes** and a **manual function** for preparing drinks. Designed to guarantee **high performance, ease and comfort of use and safety**. Although compact in size, it is equipped with a capacious jug which can hold up to 600ml for heating and 250ml for frothing.

The MFF01 milk frother can be used to prepare **drinks with or without foam**. Simply change the **type of whisk**: the **notched accessory** creates a dense, creamy foam while the **smooth**-edged attachment prevents liquids from sticking to it. The safe, fast **induction heating system** is only activated once the type of preparation has been selected and switches off automatically when the programme is finished.

The various different programmes available allow you to froth **milk** and choose whether you want a light or dense foam, for a hot or cold result to satisfy the personal tastes of any guest. In addition, when you select the **chocolate** function and use the typical recipe ingredients - milk and pieces of chocolate - the uniform movement of the whisk and the optimal pre-set temperature enables you to effortlessly create a **thick, smooth, authentic hot chocolate**. A manual function is also available, for **preparing tea, infusions** and other soluble hot drinks, such as **“orzo” or barley coffee**.

The new Smeg milk frother is a must-have for anyone who likes to **breakfast in style**, accompanying a tasty slice of toast and orange juice with a **cappuccino or a frothy latte macchiato**. It is available in pink, green or pastel blue colours, or in black, red, cream and white, to match the **aesthetics of any kitchen**.
