

**Q7**  
Simple Cleaning. Simpler Emptying.  
**Max+**

# Serious Suction Power

Drag away dirt hiding in your carpets and lift off debris hiding in floorboard cracks with a maximum suction power of 4200<sup>1</sup> Pa.

1. Based on internal testing carried out by the manufacturer according to IEC 62885-2:2016 / 5.8 standards, using Max+ mode with a full battery. Actual results may vary according to the home environment.

## Durable Grime Removal

A long-lasting all-rubber brush powerfully agitates carpets to release more dirt, flicks dust into the vacuum stream, and strongly resists hair tangles. Able to move across multiple panes, it keeps close to the ground for more effective cleaning.

# Twin Cleaning Power

Vacuum and mop simultaneously to capture fine dirt that vacuuming alone might miss. Equipped with an electronic pump, the Q7 Max+ offers 30 water flow levels so you can fine-tune cleaning to match your floor types and preferences.

## 240 sqm

Maximum Mopping Range<sup>2</sup>

## 300 g

Consistent Mop Pressure

## Electronic Mopping

30 Water Flow Levels

2. Based on internal testing carried out on hard floors with a full water tank, full battery, and low water flow. Actual results may vary, depending on the room characteristics. Range is an estimate based on the assumption that 20% of the area is covered by furniture and will not need to be mopped.

# Combined Dustbin & Water Tank

Combining the dustbin and the water tank into one unit increases the capacity of both. It also makes it easier to empty the bin and refill the tank in one trip.

**470 ml**

Dustbin Capacity

**350 ml**

Water tank Capacity

# Clean On and On

Driven by a large 5200 mAh Li-ion powerhouse, Q7 Max+ can clean non-stop for up to 3 hours<sup>3</sup> on a single charge. Easily enough range to tackle most homes.

3. Based on internal testing carried out by the manufacturer in Quiet mode on hard floor with a full battery.

# Precision PreciSense LiDAR

Roborock's PreciSense LiDAR system is the brains behind your robot's extraordinary ability to find the most efficient way to clean throughout your home. The maps it creates power a suite of features controlled in the Roborock app.

# 3D Mapping

Take a new look at your home and get a clearer understanding of your layout with 3D Mapping. You can even add furniture and floor materials to create a more accurate representation of your home.

# Routine

**S** Do you cook a lot? Find yourself always turning up the suction and sending the robot to the kitchen? Set a routine for that and do it with one tap instead of several. You can also add schedules to any routine you set.

Full Clean

After Meals

# No-Go Zones and Invisible Walls

No-Go Zones define an area that the robot cannot go, while Invisible Walls draw a line and are good for sealing off rooms and corners. Every level in your home can have No-Go Zones and Invisible Walls. All are placed automatically after the level has been recognized.

# Keep Kids & Pets Safe

Curious kids and clumsy pets might accidentally start a clean with the push of a button. Stop that from happening with the Child Lock.

# Seven Weeks Without Emptying

Clean often, empty rarely with the Auto-Empty Dock Pure. It empties your robot automatically into its 2.5 L dustbag, every clean, for up to 7 weeks<sup>4</sup>. When the bag is full, it can be swapped out in seconds.

4. Actual emptying interval will depend on use habits and environmental factors.
