

S8 MaxV Ultra

Cleaning Beyond Limits

FlexiArm Design™ Side Brush

Sweeps up messes in hard-to-reach
corners with the extendable side brush.

100%*
Internal Corner Coverage

*Certified No. 111279039 by TÜV Rheinland.

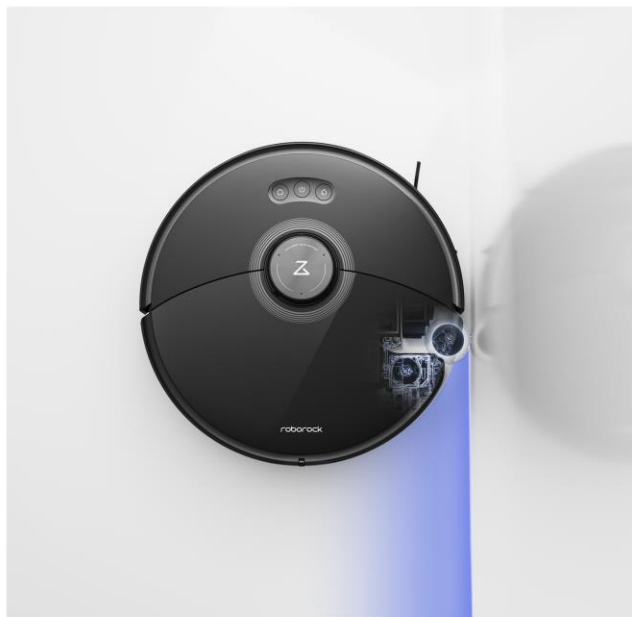

Edge Mopping System

With a 185 RPM* liftable edge mop, the extra mop reaches closer to edges, eliminating dirt you hardly see.

<1.68mm** Along the Edge

185 RPM* Rotating Speed

* Based on Roborock internal testing, when selecting extreme water flow in custom mode, the mops can spin at a maximum speed of 185 rpm.
** Based on Roborock internal testing. Actual results may vary depending on environmental factors.

VibraRise™ 3.0 Sonic* Mopping System

Vibration modules are liftable up to 20mm** and vibrate up to 4000 times/min for a better cleaning experience.

2X

Vibration Modules

4,000 times/min

Sonic Mopping

20mm

Lifted Above Surfaces

*Based on Roborock internal testing. The term relates to the integrated mop module being able to be driven to produce high-speed reciprocating vibration of up to 4000 times/min, i.e. up to a frequency of 66Hz which is within a "sonic" range (20 to 20,000Hz).

**Based on Roborock internal testing, the mop module can be lifted to 20mm above the ground.

Liftable Brush and Mop

The brushes and mop boast a liftable design and adjust automatically, maximizing cleaning efficiency while preventing any staining of the freshly cleaned floor.

DuoRoller Riser™ Brush

Achieves greater vacuuming efficiency across all floor types and ensures fewer hair tangles* thanks to the power of the dual-roller brush, designed for a cleaner, hassle-free environment.

Less hair-tangled with concealed scrapers

*Based on internal testing carried out by the manufacturer. Compared with Roborock S7.

10,000 Pa Extreme Suction

HyperForce™ suction has been improved to 10,000 Pa* so your robot vacuum can reach deeper and capture dust and debris from hard floors and carpets.

10000Pa

*As measured in a standard testing laboratory in accordance with ISO 29541-2:2021 / S1 standards. Actual results may vary.

DirTect™ Technology

S8 MaxV Ultra recognizes dirt and cleans adaptively, from increasing suction power for heavy dust to cleverly switching to mop-only mode for spilled juice. Perfectly efficient, perfectly clean.

Reactive AI 2.0 Obstacle Recognition

The robot vacuum adopts the optimal avoidance strategy, identifying up to 73* objects including pet supplies and floor mirrors, using an RGB camera and 3D structured light.

*Based on Roborock internal testing, S8 MaxV Ultra can see and bypass objects down to as small as 5cm wide and 3cm tall. Recognition accuracy may vary depending on environmental factors.

"Hello Rocky" Intelligent Voice Assistant

Easily start cleanups and make adjustments by saying "Hello Rocky", even without a WiFi connection. Whether you're busy cooking, tending to kids, or simply unwinding, cleaning has never been simpler.

Roborock SmartPlan™

With SmartPlan™ Mode on, the robot will automatically determine how to clean based on the environment.

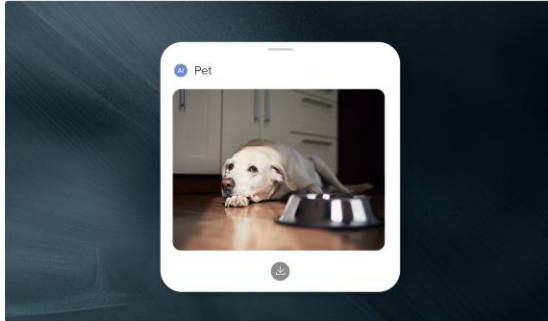

Specialized Pet Cleaning

Deep Cleaning Near
Pet Supplies

*To boost suction power around pet supplies, please activate the "Pet Supply Deep Cleaning" on the App.

Pet Friendly Features

Pet Snaps

As your personal pet photographer, the S8 MaxV Ultra captures adorable snapshots of your furry friends during cleanups, readily available for you to download.

Find Pets with One Click

With a simple button on the App, S8 MaxV Ultra will roam around your home and help you find your pet.

Vacuum Carpet First

The brushes and mop boast a liftable design and adjust automatically, maximizing cleaning efficiency while preventing any staining of the freshly cleaned floor.

Deep Carpet Cleaning

The brushes and mop boast a liftable design and adjust automatically, maximizing cleaning efficiency while preventing any staining of the freshly cleaned floor.

Carpet Boost

Identifies the carpet with ultrasound and automatically boosts the suction.

*Based on Roborock internal testing, S8 MaxV Ultra can see and bypass objects down to as small as 5cm wide and 3cm tall. Recognition accuracy may vary depending on environmental factors.

Temporary Cleaning Supported

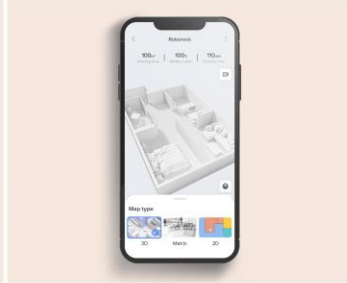

For rooms that need a little extra attention (Temp Cleaning) or don't need any attention (Temp Skip).

**To boost suction power around pet supplies, please activate the "Pet Supply Deep Cleaning" on the App.

Multifunctional Map Features

Multi-level*

Quick Mapping

*Up to four floors supported.
**Compared to CleanMapping mode. Actual results may vary according to home environment.

Cleaning Access, Always Within Reach

Third-Party Voice Control

Voice commands via Amazon Alexa, Apple Siri, or Google Home.

Launcher Widgets

One-click access to custom cleaning routines.

Apple Watch App

Quickly start cleanups or do a status check.

All-in-One Dock– Water Tank Version

The convenience of automatic dock water refilling and draining, automatic emptying, hot water mop washing and drying, robot water refilling, detergent dispensing, and fast charging features ensure a worry-free cleaning experience.

All-in-One Dock— Auto Water Refill and Drain Version

The convenience of automatic dock water refilling and draining, automatic emptying, hot water mop washing and drying, robot water refilling, detergent dispensing, and fast charging features ensure a worry-free cleaning experience.

60°C Hot Water Mop Washing

Easily dissolves oil stains on the mop, making it suitable for kitchen and dining areas.

*Based on internal testing carried out by the manufacturer, the water for mop washing can be heated up to 60°C at standard room temperature. The actual temperature varies by environmental factors.

Dock Self-Cleaning

Free your time with the self-cleaning design that cleans the bottom of the dock for easier maintenance.

Auto Dust Emptying

Get approximately 7 weeks* of hands-free dust collection with automatic emptying into the dust bag.

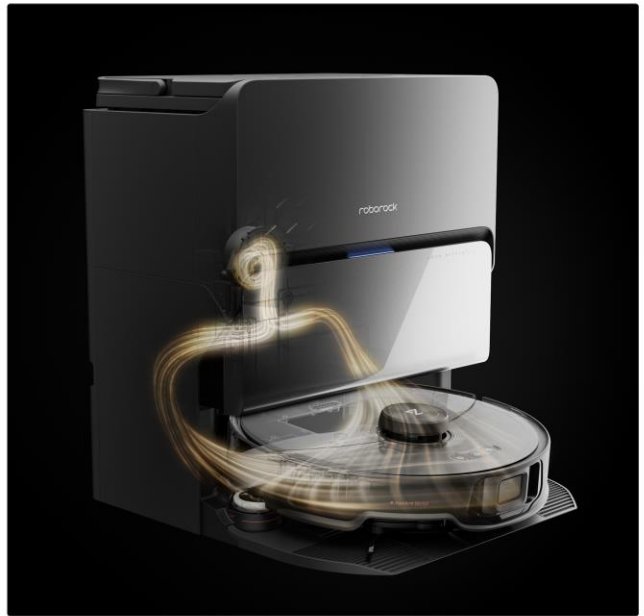

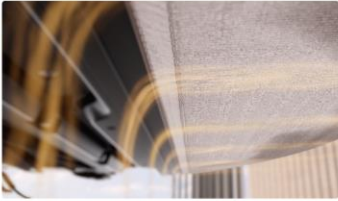

*Actual emptying interval will depend on use habits and environmental factors.

Warm Air Drying

Warm air from dual channels quickly removes moisture from mops and the dock base.

Auto Tank Refilling

Fills the robot water tank automatically for a max mopping range and to ensure consistent mopping.

Auto Detergent Dispenser

Detergent Dispenser auto-adds precise solution to the clean water for hassle-free cleaning.

Fast & Off Peak Charging

Quickly resume cleaning with 30% faster* charging than before and get the most from low energy prices by charging during off-peak hours. Do your bit for the environment.

30% Faster¹

 Off Peak Charging

*Compared to Roborock S8. Based on internal testing carried out by the manufacturer. Actual results may vary according to the home environment.

Refill and Drainage Version

Auto Water Refill and Drain

Refills clean water and empties dirty water automatically during mop washing and tank refilling, giving you peace of mind after cleanups.

Compact Design

Compact Design Seamlessly fits in your home environment and saves space with an impressive dock height of just 30cm.
