ankarsrum
ORIGINAL

IT IS THE INSIDE THAT COUNTS. AND THE OUTSIDE.

In the 1940s, when industrial designer Alvar Lenning first developed kitchen assistent, he worked with focus on functionality, quality and design. This made the kitchen assistent popular in a time when Swedish households mainly consumed food produced at home. People bakes their own bread, made sausages, made their own jams and cordials - everything was taken care of and nothing went to waste. The kitchen assistant became a durable friend in the kitchen as generation after generation faithfully kneaded, whipped, mixed, spun, pressed and grounded. Since the 1940s we have gradually made improvements, still with functionality, quality and design in focus, which today makes the machine stronger and more reliable than ever. The cream-colored original has been supplemented with a variety of colors and currently has 18 different accessories - everything you need to succeed in the kitchen. In order to ensure you that you Ankarsrum® Original works flawlessly, we test each piece before it leaves our factory in Småland Ankarsrum.

ANKARSRUM, SMÅLAND

Ankarsrum is a small town located in Småland, on the southeast coastline of Sweden. The town dates back to around 1430. The position between two lakes made it possible to use water power and a blast furnace was built in the early 1600s. In 1655 a factory was established in the small town of Ankarsrum, manufacturing iron castings, stoves and bathtubs. Today, Ankarsrum is the manufacturer of the classic stand mixer Ankarsrum® Original and its sister companies Ankarsrum Motors and Ankarsrum DieCasting conduct engine manufacturing and foundry business.
