The fridge freezer for every home

Enjoy spacious capacity and multiple storage options in this combined fridge freezer. With functional design and reversible door this fridge freezer will be a perfect match to any kitchen.

Blends in seamlessly

There is no need to pick from limited colour options to match with your kitchen style and design choices. This integrated fridge freezer seamlessly blends in with your kitchen, and you can choose freely which cabinet complement your style and home the best.

Convenient controls

Easily change the settings on the control panel inside of the fridge freezer. Adjust the temperature or activate desired functions such as quick freezing using **Super Freeze**.

User- and environmental-friendly

Let the fridge freezer do the job. The **Auto defrost** function takes care of any frost build-up. The product runs quietly and is energy efficient both for you and the environment. To help you find your favourite foods, this product uses a LED light that is brighter, more durable, and more energy efficient than a standard bulb.

Varied and adjustable storage options

This fridge freezer has storage options for all types of food. Whether it be keeping fruits and vegetables fresh or frozen food nutritious and tasty for a very long time in the four-star compartments, this product can do it. Both the fridge and freezer have lots of space and the glass shelves can be removed to make room for all needs.
