

More efficient, more enjoyable cooking

The 300 induction hob heats the pan directly, for fast, accurate temperature response and more enjoyable, more precise, more energy-efficient cooking.

Product Benefits & Features
Induction cooking offers fast, efficient, responsive heating

Induction hobs heat pans directly rather than through a burner. This makes heating both faster and more efficient, with precise, immediate temperature control.

Matt perfection for the modern kitchen

The refined matt surface gives your hob an elegant look. Its matt, modern design blends effortlessly with contemporary interiors, adding an understated touch to your kitchen.

Control at a touch

There's no guesswork required with Induction Touch Controls. Access the settings through the touch-sensitive glass surface, and you can easily increase or decrease the temperature. And with no protruding buttons or knobs to consider, it's easy to clean.

The Booster function. Rapidly boils water. Quickly gets pans hot

The Booster function quickly gets water boiling and rapidly gets pans hot. For when you need a quick start to your cooking, so you can spend more time enjoying your meal.

Lock your cooking settings

The key lock feature on our hob means your cooking settings will stay as they are, even if the control panel is accidentally touched by anyone – even children. This also means you can wipe up any spills without affecting the cooking process.

- Left front zone: 2200/2400W/210mm
- Left rear zone: 1400/1500W/145mm
